

Device screw / Device screw box

Characteristics:

Head diameter: 5,5 mm, countersunk head

Drive: Combined cross recess

Material: Electrogalvanised steel

Thread: M3 self-tapping, Ø 3,2 mm

Application:

For device fastening of switching inserts and sockets in concealed or cavity wall boxes.

Also for lid fastening.

All Advantages at a Glance

- Due to the combined cross recess all common screwdrivers with slot or cross can be used.
- The side limitation of the slot prevents slipping of the screwdriver.
- In the box all screw dimensions are sorted and stored without chance of loss. Due to the rotating opening the screws are easy to reach.
- The box can be refilled and is therefore ecofriendly.
