Wall gap-Fixx MSF

The flexible Fixx!

Have you already tried our innovative Wall gap-Fixx?

Applicable in wall gaps from 20 to over 70. Because of the different positioning and adjustability possibilities, this product can be used in about every imaginable wall gap to fixate cables and tubes.

The first possibility is to simply push the product into the wall gap. The Fixx will hold itself and the cables or tubes in place in wall gaps from 20 until 27 mm.

The second possibility works best in wall gaps with a width of 24 to 46 mm. By pushing the Fixx together, the product will adjust itself to the wall-gap, making use of its innovative "cable tie"-click system. This makes sure your cables and tubes will stay in place!

The final possibility is to use the product as a nail disk. To do this, you only have to push the right nail through the nail hole and you can knock the Fixx in the wall. The click-system can still be used, but it isn't necessary.

Type	Article description	VPE (Pcs.)	Shipping carton (Boxes)	Article number

MSF Wall gap-Fixx can be used with a nail to prevent loosening and to ensure maximum hold in poor surface quality.

The clicked-in Wall gap-Fixx, clamps itself in the wall gap and holds the cables and tubes in place without any effort.

In the narrowest wall gaps, the Wall gap-Fixx can be pushed in the wall gap without even operating the click-system. The cables are still being hold firmly in their positions.
